Antennas that keep you connected... when communications are critical
Vehicle Tracking & Fleet Management
Mobile Mark offers the wireless industry’s most extensive line of antennas for fleet management solutions, whether you need a simple GPS-only antenna for navigation or a Multiband Antenna that combines multiple applications (such as Vehicle Telematics, WiFi Hotspots, Trunking or Orbcomm) in the same package. We even offer LTE MIMO and WiFi MIMO in a surface mount mobile antenna.

We understand that wireless applications in the Public Safety sector are changing. What used to be the exclusive domain of VHF & UHF is giving way to GPS, Broadband Cellular and WiFi. Mobile Mark’s line of innovative multiband antennas help Public Safety communication specialists custom tailor their wireless solutions. We offer more than just a wide range of antenna designs; we offer the company behind the antennas. Mobile Mark’s full line of antennas are proudly Made-in-the-USA.

Cellular M2M
Mobile Mark’s broadband antennas cover all of the possible cellular frequencies from the established 850 & 1900 MHz bands to the new LTE band at 700 MHz, and AWS bands at 1.7 & 2.1 GHz. All feature efficient RF designs with high performance across the entire bands. Mobile Mark’s surface mount antennas are built to be rugged and meet Industry and Military specification for shock, vibration, temperature, and water ingress.

WiFi Hot Spots & Wireless Video
Public Safety WiFi applications range from data links in the police station to wireless video streaming, to emergency hot spots. An mix of site, mobile and device antennas needed to fill out the network with the mechanical factors such as weather resistance, compact size and durability found throughout Mobile Mark’s line of antennas. MIMO Multiple-Input-Multiple-Output antennas are offered for 802.11ac networks.

Land Mobile Radio
Mobile Mark’s UHF antennas offer unique solutions that are compact in size and resist damage from impact or tampering. The new antenna profiles accommodate multiband frequencies so UHF can now be combined in the same antenna package with GPS for Fleet Management and WiFi for mobile hotspots. Mobile Mark’s new UHF Ceiling Mount Antenna offers an attractive solution for NFPA-72 compliant in-building installation.

Specialized Networks
From space saving Directional and Omni-directional Site Antennas to rugged multiband mobile antennas, Mobile Mark has an impressive range of products for specialized networks such as the Public Safety 700 MHz band or 4.9 GHz band. To complete the installation, cable assemblies are available. Don’t be caught short in a life-threatening situation; choose antennas you can rely on to keep you connected.

Public Safety and Emergency Response professionals need dependable wireless connections. Antenna selection plays an important role in providing optimum performance. From fleet management to video streaming to network build-out, Mobile Mark antenna solutions help ensure consistent wireless coverage.
Our antennas cover many commercially available wireless networks (Cellular, LTE, ISM, WiFi, GPS, RFID, and VHF/UHF) as well as specialized networks such as 4.9 GHz. Your installers will like the fact our antennas are easy to install and service free.

We have been designing and manufacturing antennas since 1984, with an established track record for high performance and quality service. Our antennas are Made-in-the-USA and tested to rigorous industrial and military standards. We offer quick responses for both product support and engineering advice.
